COVER:

The original design of the Nova Scotia Tartan was by Mrs. Bessie Murray in 1953. The colours in the Tartan were chosen to signify certain aspects of the Province. The blue denoted the sea and sky as well as being the blue of the cross on the Nova Scotia flag. The dark and light greens signified the evergreen and deciduous trees characteristic of the Province, and the white was for the rocks and surf of the coastline. Gold represented Nova Scotia's Royal Charter and red symbolized the lion in the Nova Scotia crest on the flag.

The first official wearing of the Tartan was in the summer of 1954 by a Scottish piper at the Nova Scotia-New Brunswick border. It now belongs exclusively to the Province of Nova Scotia due to an Order-in-Council in April 1963, by then Premier the Hon. Angus L. MacDonald.

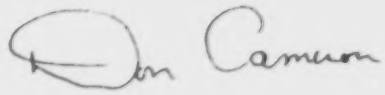
INTRODUCTION

It is my pleasure to present the new 1990-91 issue of the "Nova Scotia Directory of Manufacturers". This publication is one of several ways the Nova Scotia Department of Industry, Trade and Technology supports and encourages the entrepreneurial spirit of our province's manufacturers. It has been prepared to provide a reference tool of information on approximately 2,000 Nova Scotian manufacturing firms.

Our province is uniquely suited to promote growth of manufacturing. We have a skilled and stable labour force, numerous research and educational facilities. Industrial parks/malls throughout the province are astride the major trading routes of the world. Value of manufacturing shipments reached $4,356 million in 1988. Being adjacent to the vast United States market of an estimated 246 million people, and in particular, the northeastern and central United States, accounts for this area being our strongest export market. Approximately 66 per cent of Nova Scotia's $2.1 billion foreign exports in 1988 were destined for markets within the United States.

We wish to thank each manufacturer for supplying information for this Directory. We trust that it will serve manufacturers, buyers and the public, both at home and abroad.

The Nova Scotia Department of Industry, Trade and Technology and the individual firms invite inquiries regarding our Nova Scotia made products.



Donald W. Cameron
Minister of Industry, Trade and Technology

NOVA SCOTIA—FACTS

Nova Scotia, with a land area of 52,840 square kilometres and a population of 886,800, is uniquely suited for industry and trade. The province, being the most easterly point on the North American mainland is the focus of the Atlantic Provinces and is strategically located to connect to the major trade routes of the North Atlantic. Halifax, the capital city, has a year-round natural harbour with charted channel depths of 70 feet at low tide. Facilities at the Port of Halifax include 35 deepwater berths, 15 transit sheds, a grain elevator, two container terminals, an up-to-date shipyard with a drydock capable of handling Panamax-size vessels, and the leading autoport in Canada. Point Tupper, on the Strait of Canso, has facilities to serve large crude oil carriers. At the port in Sydney, an international trade zone exists. The Halifax International Airport is the major air freight and passenger terminal in the Canadian Atlantic region connecting with many large centres throughout North America and Euorpe. In addition, there are regional airports at Sydney and Yarmouth, and seven municipal airports throughout the province. The Atlantic terminus of the Canadian National Railway is at Halifax.

USE OF DIRECTORY

The "1990-91 Nova Scotia Directory of Manufacturers", produced from a computer based file, lists approximately 2,000 manufacturers in five sections: alphabetic, geographic, Standard Industrial Classification Code, product and industrial park location sequence. We hope that overall, these sections will provide you, the users, with a very comprehensive reference guide. For an interpretation of the format and codes used throughout the Directory, please refer to the title page at the beginning of each section.

Firms included in this Directory have been classified according to the descriptions used for manufacturers in the Canadian Standard Industrial Classification Manual, 1980, published by Statistics Canada (Cat. No. 12-501). In this regard, we have attempted to include all those industries involved in some form of manufacturing operation; however, in the case of sawmill operations, inclusion was limited to those mills producing 100,000 fbm (board feet) or more per year. A complete listing of the smaller operators is available in the Nova Scotia Department of Lands and Forests, "Nova Scotia Forest Products Directory". Maple sugar and syrup operations on farms are excluded from the Directory as the Canadian Standard Industrial Classification includes them in specialty farming rather than in the manufacturing sector. Consult "Directory Agriculture" published in the Nova Scotia Department of Agriculture and Marketing, for comprehensive information on the Province's producers of maple products. Upholstering firms, formerly included in the manufacturing sector, are now classified with "Household Furniture, Appliances and Furnishings Industries, Retail". For this issue of the Directory, these firms have not been dropped, however, and they are listed under S.I.C. 6213, a non-manufacturing category.

For those requiring assistance in locating geographic place names, you may refer to the Nova Scotia Book of Maps, compiled jointly by the Nova Scotia Department of Lands and Forests and Nova Scotia Department of Mines and Energy (available from the Nova Scotia Government Bookstore, P.O. Box 637, Halifax, Nova Scotia, B3J 2T3, @ $10.00 each).

SECTION I — ALPHABETIC CLASSIFICATION

ALPHABETIC CLASSIFICATION

This portion of the Directory lists companies alphabetically, providing a complete detailed record of all known Nova Scotian manufacturers. Each company listing includes location, year of establishment, management contacts, telephone/telex number, Standard Industrial Classification code (S.I.C.), market area indicator, employment number and products produced.

For companies with more than one manufacturing establishment in Nova Scotia, the overall company name will appear first, followed by each plant name (in italics print). Full detail will be given for each plant.

SECTION III — STANDARD INDUSTRIAL CLASSIFICATION

STANDARD INDUSTRIAL CLASSIFICATION

Plants appear in this section of the Directory according to the Standard Industrial Classification code (S.I.C.) under which they fall. Plants are coded according to the major product they produce (major product is defined as that item representing the largest component of total dollar sales). The location, number of employees and market area indicator are shown for each plant.

SECTION IV — PRODUCTS CLASSIFICATION

PRODUCTS CLASSIFICATION

This section ranks all known Nova Scotian manufactured products alphabetically. All plants which produce a particular product are listed under that product. For each plant, the location, Standard Industrial Classification code (S.I.C.) and number of employees are given.

Where possible, related types of products are grouped together by using a common header in the product description, i.e.,

FURNITURE, AUDITORIUM & THEATER
FURNITURE, BEDROOM, WOODEN
FURNITURE, BEDS, METAL
